

Manufacturer's Declaration - for cutting and replacing the existing connectors

Name and address of the manufacturer

Company: Solarwatt GmbH		
Street: Maria-Reiche-Straße 2a	ZIP: 01109	Location: Dresden
Phone number: +49 351 8895-0	Email: info@solarwatt.com	

For Solarwatt solar modules the existing connectors may be cut off and replaced - as per specifications in the Solarwatt installation instructions.

This authorization is only valid under the following conditions:

1. The existing connectors may be cut off and replaced at the start and the end of the string or where the existing cables on the module are not long enough. This has to be done in accordance with the connector manufacturer's assembly instructions. Only qualified personnel are allowed to do this.
2. The existing connectors shall only be cut off and replaced in the correct manner using tools which have been approved by the connector manufacturer.
3. The cable shall only be cut right behind the connector which is to be removed. Only the following connector types shall be used for replacement:

Stäubli Electrical MC4, Stäubli Electrical MC4-Evo 2, Stäubli Electrical MC4-Evo ready, TE Connectivity PV4 und PV4S, TE Connectivity SOLARLOK Slim Line 4 mm², Hirschmann HC4, Sunter PV-ZH202B, Phoenix Contact Sunclix

4. When cutting and replacing, as well as during subsequent laying of cables, the minimum bending radii according to the Solarwatt installation instructions must be observed.
5. The relevant statutory provisions must be observed in any case.

Any warranties provided by Solarwatt do not apply for solar modules which are impaired, damaged, or destroyed because the aforementioned requirements were not met.

The retrofitted replacement connector is not covered by the Solarwatt warranty. The remaining warranty provisions shall continue to apply. All other provisions of the Solarwatt installation instructions shall remain unaffected.
