Quick guide to configuring MyReserve 25 via web interface/Web UI:

Note: Alternatively, you can carry out the configuration via the MyReserve App FaQ MyReserve App.

To connect to MyReserve via LAN, the storage and the computer must be on the same network.

- 1. search the customer network for the device name/host name http://mrc.local/
 - a. If the device name/host name is not displayed in the network, you can also use MyReserve APP to read the IP address under the "Pro" options in the "Device Settings
 - b. The MyReserve can also be identified using the MAC address.
 - Example: Serial number: <u>0004A3</u>0B00<u>0C49BA</u> -> MAC address: <u>00:04:A3:0C:49:BA</u>
- 2. enter http://mrc.local/ or the corresponding IP address in the address bar of your browser

- Under "Country code" you can change the country setting
- Under "Hostname" you can assign a number from 1 to 99 for better network identification in case there are more than one MyReserve 25 (cluster) in the network.

Note: confirm each setting by clicking on the respective "Submit" button.
